

Student Energy Project

Talybont Energy is looking to fund a 4 week 'student' energy project based in our Talybont area this summer.

We are looking to select a project which researches or develops an idea which could either reduce our community's energy or generate new energy from a sustainable source.

Projects could be in any of the following areas: domestic heating, food, transport, material consumption, waste, fashion, resource sharing or leisure activities/tourism.

Applications are open to students or unemployed people aged 16-25 years who are either part or full residents in the Talybont area or have strong links with it.

The funding will cover 20 days work carried out between July and September 2026 at a rate of £100/day. A small amount of additional funding may also cover reasonable project costs as required.

The selected project will be supervised by a Talybont Energy Director and require a short report and presentation at its conclusion.

Applications close on Monday March 23rd 2026 at 9am.

How to apply

You can apply to the Fund by emailing the following information to alison@prospectory.co.uk before **9am on Monday March 23rd 2026**.

You need to tell us:-

- Your name, age, mobile no. and your connection to our Talybont area.
- Your current educational or employment history including any qualifications and skills.
- Your interests and why you chose to apply.
- What's your project idea? How might it either reduce community energy use or generate energy in new, sustainable ways?
- How would you either research or develop your idea?
- Can you estimate the likely costs involved?
- How does the project match your interests and skills?
- Does your project connect to your educational studies or future employment in any way?
- Are you free to commit 20 days to this project during July and August?
